Over 2,000 people have already joined the Practice Management Network – a new national network run by and for practice managers.

The network has already published a comprehensive guide packed with top tips to help you run your practice smoothly. So whether you want to set up an internet booking system, install a surgery pod, improve your telephone infrastructure or establish an SMS appointment reminder system, you can get advice from someone who's been there.

Visit the website and sign up to the network at **www.networks.nhs.uk/practicemanagement**

## Look out for your toolkit

***Improving access, responding to patients – a 'how-to' guide for GP practices*** was sent to all practices in August. An interactive and downloadable copy is now also available on the website.
